HOSES

LIQUID FORMS

Do you need to clean hoses that have...

- ▶ Multi-end connections
- ▶ Varied internal hose diameter sizes ranging from 15 to 75mm
- ▶ Hose lengths up to 5m
- ▶ Materials of hose construction that can limit flex performance
- ▶ Surface finish of the hose internally and externally can impact cleaning demands greatly

IWT have the perfect cleaning solution:

200EVO cGMP CONTACT PARTS WASHER

- ▶ Large internal chamber capacity to allow an ergonomic placement of multiple hoses per wash cycle
- ▶ Full utility circuit control to ensure excellent wash water coverage performance to all hose surfaces
- ▶ Multiple connection options to ensure inter-change abilities to all conventional hygienic grade end connections
- ▶ Full control towards both internal and external drying functions
- ▶ Total compliance towards a cGMP standard of design and construction
- ▶ Interchangeable racking designs to allow for total customisation if needed
