EXCELLENCE IN PROJECT MANAGEMENT

At the Tecniplast Group, we have built a strong reputation for delivering high-quality projects through consistent, structured management. This is driven by our dedicated Project Management Team, whose many years of experience in the pharmaceutical and life sciences sectors to ensure precision, reliability, and peace of mind.

Every project benefits from a dedicated Project Manager, your single point of contact, who coordinates seamlessly between you, your contractors or Estate Teams, and our manufacturing plant. With a proactive and experienced approach, our team ensures complete oversight of all project aspects, supported by clear and detailed monthly reports for full transparency and early risk detection.

For you, this means projects delivered on time, on budget, and to the highest standards. Our proactive planning saves resources, effort, and cost while providing smarter solutions and reducing risks before they become problems.

With the Tecniplast Groups Project Management Team, you gain more than execution, you gain a trusted partner committed to your success.

Our Story

The Tecniplast Group is named after its historic LAS division: Tecniplast S.p.a was founded in Italy in 1949, and is today a global leader in biomedical research.

Since the 2000s, it has expanded into pharmaceutical washing systems through its IWT brand, which entered the aseptic applications field in 2024.

In 2023, it launched the Tecnilabo brand for the lab sector by merging three Italian companies: BioAir, Labosystem, and KW. All this makes the Tecniplast Group today a reference point for integrated solutions that meet diverse research needs.

About Us

Innovation, quality, and digitalisation are the drivers that guide us in product design.

Our equipment is 100% Made in Italy, manufactured to the highest quality standards (as demonstrated by ISO 9001 certifications), using cutting-edge processes and machinery, all while fully respecting the environment (as per ISO 14001 certification).

From design and production to installation and after-sales support, the Tecniplast Group is not just a supplier but a partner standing alongside its customers.

Vision, Mission & Values

Vision

To lead the transformation of life sciences and GMP operations as all-in-one innovation partner, empowering discovery and manufacturing of novel therapies for better global health.

Mission

We contribute to the advancement of biomedical research, GMP manufacturing, and lab operations through integrated solutions that elevate quality, safety, and reliability - driving scientific progress with innovation and passion.

Values

We contribute to the advancement of biomedical research, GMP manufacturing, and lab operations through integrated solutions that elevate quality, safety, and reliability - driving scientific progress with innovation and passion.

PROJECT
MANAGER

Operating within ISO9001:2015 standards, the department follows well-defined procedures to ensure consistency and quality. With over 500 successful projects delivered across the Lab, Pharma and Life Sciences sectors, the team brings extensive experience working with end users, facility managers, architects and leading UK contractors.

They combine strong project control with in-depth knowledge of equipment applications and hands-on collaboration with engineering teams. Their exposure to a wide range of client sites ensures they understand the critical role of project management within live operational facilities, making them trusted partners for even the most complex projects.

Completed Projects

Pharmaceutical

- GSK
- Pfizer
- Easai
- MSD
- AstraZeneca
- Novartis

Charitable Organisations

- The Wellcome Trust
- Cancer Research UK
- Institute of Cancer Research

Research Labs

- Envigo/Inotiv
- Labcorp
- Sequani
- Charles River

Government

- Medical Research Council
- Defence Science Technology
- Public Health England
- Health Protection Agency
- Animal and Plant Health Agency
- Biotechnology and Biological Sciences Research Council

Universities

From Plymouth to Aberdeen – and everywhere in between. Our services span key locations across the UK, including London, Cambridge, Oxford, Manchester, Glasgow, Edinburgh, and many more.

Project Manager Responsibilities

At Tecnilabo, our Project Management team ensures every project is delivered efficiently, safely, and to the highest standards. From initial surveys and technical specifications, through planning, installation, and commissioning, we provide complete oversight and support.

Our services include ISO-compliant documentation, AutoCAD drawings and Revit models that are fully compliant with BIM standards, GANTT scheduling, risk assessments, certified installation procedures, and full client handover. With experienced, certified PMs coordinating every stage, we guarantee projects are completed on time, on budget, and with complete transparency through monthly reporting to key stakeholders.

- ISO-compliant documentation
- On-site/off-site meeting support
- Change control & GANTT scheduling
- AutoCAD drawings & 3D BIM models
- Technical specs & URS compliance
- Factory Acceptance Tests & pre-install surveys
- Risk assessments & certified installation procedures
- User manuals, commissioning & validation
- Snagging, as-built drawings, site acceptance tests & final handover
- Internal handover & project summary

At the conclusion of each project, our Project Manager provides a comprehensive end-of-project report, detailing all installed equipment, serial numbers, warranty start and duration, service contract information, and training records. This ensures a seamless handover, complete transparency, and peace of mind for our clients.

Proposed Timeline

PHASE Contract Award

- 1 Official handover from Sales Team to Project Manager (PM).

PHASE Project Kickoff

- 2 PM becomes the focal point, fully understanding client expectations and project scope.

PHASE Stakeholder Liaison

- 3 PM coordinates with clients, contractors, suppliers, and internal teams.

PHASE Group Support

- 4 Access to Tecniplast Group resources, including factory PM, R&D, Design, Production, and Management.

PHASE Project Delivery

- 5 PM oversees installation and ensures project completion to scope, schedule, and quality standards.

PHASE Handover Pack

- 6 Comprehensive documentation passed to Technical Service Department for ongoing equipment support.

PHASE Lessons Learned

- 7 Review meeting with PM, lead install engineer, Service Director, and Technical Director to capture feedback.

PHASE Continuous Improvement

- 8 Lessons integrated into processes across the Tecniplast Group and the broader group for future projects.
